

HEMLOCK MEADOWS

Explore a Lush Green Meadow

LOCATION

Approximately .5 miles up the road toward Sunglow Campground you will park just after a pond on your left. Travel north and then veer east to continue on the trail.

TRAIL TYPE

This trail is a short, easy hike.

DISTANCE

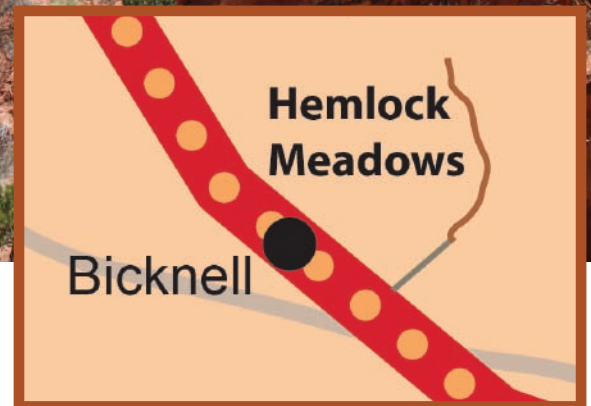

Hemlock Meadows is 1.3 miles, (2.1 kms). The trail-head elevation is 7152 and the elevation gain is 383 ft.

DIFFICULTY

This hike is easy. Some sections of the trail are steep because of the elevation gain, but it is still relatively easy.

TRAIL DESCRIPTION

The walking surface is fairly packed sand and harder dirt. This will be easier to walk on in the early part of the year and may loosen up in warmer summer months.

EQUIPMENT

This trail is for hiking only and requires no extra equipment.

ENVIRONMENT

The weather is usually good. If it is raining the path will be more difficult due to mud.

SAFETY

Make sure to take the usual precautions before starting the hike.

TAKE IN THE VIEWS.

As you move northeast you will enter a beautiful canyon. Here you will want to stay on the left hillside as there are two washes below that are difficult to negotiate. You will soon begin to see the center of the canyon become a gorgeous meadow that sprawls across two thirds of the canyon floor.

GET A CLOSER LOOK.

At the back of the trail the canyon breaks into two forks. To reach that fork you will have to walk through the meadow. The fork trail will end just beyond the meadow. Be mindful of where you walk. This is a beautiful short hike.

Trail tip: This is a great hike for any age. Be sure to be careful while walking through the meadow.
